Join Us

September 22-25, 2010

The Ritz Carlton

Denver, CO

Meetings International Natural Resources Enterprise (MINE) presents the 2010 Modern Energy Investor Forum®, in beautiful Denver, Colorado. This private event provides attendees the opportunity to watch modern energy company presentations and to meet privately with company CEOs. These prearranged, 1:1 private meetings between company CEOs and money managers with specific modern energy interests, increases the value of attendance at the conference exponentially.

The Modern Energy Investor Forum is designed to be vertically integrated and to include “full-life cycle” information about energy and how we are developing energy to meet our needs. This means, for instance, that the program will include presentations by experts about the state of a specific market, such as base load power, and the speakers in that session will be from a variety of base load power solutions, as well as speakers addressing the resources needed to provide that power.

The program also includes expert speakers giving educational presentations on the current state of the industry and the marketplace. Corporate presentations from over thirty public and private companies in a variety of sectors will be showcased. These presentations will include; wind, solar, hydro, biofuels, biomass, geothermal, uranium/nuclear, lithium/batteries and other clean technologies aimed at institutional investors, fund managers, analysts, and venture capitalists.

Modern Energy / n.pl. mo•dern en•er•gy:

An umbrella term to incorporate all types of energy including, but not limited to, solar, wind, wave, hydro, biofuels, bio-mass, geothermal, nuclear, magnetics, storage, conservation and new ways of generating, storing, and conserving energy we have yet to discover.

What makes this conference different from the rest?

The answer is the 1:1 philosophy that guides our conferences.

It's because for the last 25 years, we have specialized in putting investors and businesses together in a comfortable, personalized atmosphere. We go beyond prescreening businesses and investors – we work with you to identify the types of companies you want to meet, and facilitate 1:1 conversations that benefit both investor and business.

25 Years In The Making

Our formula is simple, but it's one that we've perfected over the past quarter-century:

1. We accept only the most qualified companies.

There are many firms seeking funding, but we invite only those that meet certain criteria designed to ensure you won't be disappointed in their business plan, their professionalism and their potential for success.

2. We maintain a pre-specified ratio of investors to businesses.

In our 25 years of hosting and attending investor conferences, we've seen too many investors inundated with frenzied sales pitches in an overcrowded atmosphere. We manage the MEIF so investors can spend more time connecting with good companies, and less time screening others.

3. We make time for 1:1 meetings.

Time and again, the most common feedback we receive is that the time we reserve for 1:1 meetings was of immense value to our investor clients. These conversations are held in a relaxed atmosphere and allow for meaningful relationship building.
